RAMESH DODDI

Anakapalli, Andhra Pradesh, India | 8186985583 | ramesh.r.doddi@gmail.com
LinkedIn: Ramesh Doddi | GitHub: Ramesh-doddi

Professional Summary :

Software Engineer with 1.5+ years of experience building enterprise healthcare applications using C#, .NET, Azure, and AI technologies. Experienced in developing cloud-native microservices, secure APIs, multi-tenant architectures, and AI-powered clinical workflows. Skilled in FHIR-based healthcare interoperability, resilient distributed systems, and external system integrations, with a focus on backend engineering, system reliability, and scalable application design.

Technical Skills :

- ✓ **Languages**: Java, Python, C#, SQL
- ✓ **Frameworks & UI**: ASP.NET Core, Blazor Server, MudBlazor, Syncfusion
- ✓ **Cloud & DevOps**: Microsoft Azure (App Services, Container Apps, Key Vault, API Management, Azure OpenAI)
- ✓ **Tools**: Visual Studio Enterprise, Postman, SQL Server Management Studio (SSMS), GitHub, GitHub Actions, LabelImg, GitHub Copilot, Claude AI
- ✓ **Core Concepts**: DBMS, Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC)
- ✓ **AI & ML**: Foundational understanding of Machine Learning (ML) and Deep Learning (DL) models

---

Work Experience:

Software Engineer - Praxzen (Jan 2025 – Jun 2026) :

Worked on TeyaHealth, a cloud-based Electronic Health Record (EHR) platform serving enterprise healthcare organizations.

- Developed enterprise healthcare applications using C#, .NET 8, Blazor Server, MudBlazor, and Syncfusion, building reusable UI components and maintainable frontend architectures.
- Built and maintained cloud-native microservices on Azure Container Apps, managed applications on Azure App Services, developed secure APIs using Azure API Management, integrated Azure Health Data Services for FHIR interoperability, and implemented organization-based database sharding for multi-tenant scalability.
- Enhanced AI-powered clinical documentation (AI Scribe) using Azure OpenAI, Azure Cognitive Services, and Semantic Kernel, implementing multi-region model deployments, retry and fallback mechanisms, deferred processing, and Azure Service Bus-based resilience.
- Developed reusable FHIR integration services, integrated e-prescription workflows with Ensora, and maintained technical documentation, developer guides, and API documentation using Docusaurus.
- Leveraged Visual Studio Enterprise, GitHub Copilot, and Claude AI to accelerate development, debugging, code reviews, and documentation while collaborating across frontend, backend, cloud, and AI initiatives to deliver production-ready healthcare solutions.

Forward Deployed Engineer - DataDios (Jul 2026 – Sep 2026) :

- Designed and deployed a multi-model time-series anomaly detection engine combining AutoETS forecasting with conformal prediction intervals to detect point, contextual, and collective anomalies across daily, weekly, and monthly enterprise metrics.
- Developed project-specific Claude agent workflows with reusable skills and instructions to automate development tasks, GitHub pull request creation and reviews, and repository operations using GitHub CLI.
- Parallelized development using multiple Git worktrees to isolate tasks and code changes, integrating AI-assisted workflows to streamline implementation, debugging, and code reviews.

Education:

B.Tech | GITAM University, Hyderabad | 2025 | CGPA: 9.29
Intermediate | Usodaya Junior College, Chodavaram | 2019 | 9.63
10th Standard | Bhashyam School, Chodavaram | 2017 | 9.70

Certificates:

- IBM SkillsBuild Internship
- AICTE Virtual Internship
- TCS iON – Career Edge – Young Professional

Additional Information :

Languages: English, Telugu | Interests: Meditation, badminton, chess, reading books
